## Part # 325-025 EXO-26 Full Face Mask Face Cushion Kit

Part #	Description	Qty.
310-050	Face Seal Cushion	1
345-055	100 Grit Sandpaper	1
330-807	1" Self Sticking Velcro Hook	2

The Exo-26 Face Seal Cushion Kit is designed to provide divers with smaller faces a better fit when wearing the mask. The cushion goes along the top of the inside of the face seal.

### Installation Instructions:

1. Using the sand paper P/N 345-055, rough up the two location areas (Fig 1) inside the face seal P/N 310-050 where the velcro strips P/N 330-807 will be applied. After sanding, apply a light coat of Neoprene (wet suit) cement to the roughed area and allow to dry.
2. Remove the backing paper and stick the velcro strips to the glued areas (Fig. 2) pressing firmly.
3. Insert the wide ends of the cushion into the earphone pockets. This centers the Face Seal Cushion against the mask. Press firmly against the seal, sticking the cushion to the Velcro.
