325-310	EXO BR/BR MS Reg. Rebuild Kit	1
325-060	Oral Nasal Tie Wrap Kit	1

MAINTENANCE SCHEDULE

Your regulator should be serviced on a frequent basis to achieve the best performance from your mask. A regulator which is out of tune will make it difficult to breathe. In turn, you may find yourself short of breath and unable to work to your full capacity.

Your entire regulator should be rebuilt every year. To make this job easier we recommend the **Deluxe Tool DSI Part # Kit, 325-650**

Caution - Warning

Use only KMDSI original replacement parts. The use of other manufacturer's parts will interfere with the performance characteristics of your life support equipment and may jeopardize your safety. Additionally, any substitutions will void any warranties offered by KMDSI. When ordering spares, always insist on **Kirby Morgan Genuine Parts.**
