Bulletin #8 of 2026. November 13, 2026

CHANGE TO PRODUCT BULLETIN

Stainless Steel Side Block Replaces the Chromed Brass Side Block for the SuperLite® 27®

Products Affected: P/N 500-040 and 500-041 SuperLite® 27® helmet and P/N 505-732 Side Block Assembly.

The P/N 505-732 stainless steel side block assembly will become standard for the SuperLite® 27® helmet and will use the same stud currently used on fiberglass helmets, P/N 550-024 (the longer stud). Other Kirby Morgan® fiberglass helmets and BandMasks® will also make this transition in the future, subject to stock availability.

The change improves structural durability, corrosion resistance, service life, and overall lifespan.

The P/N 505-732 Side Block Assembly will no longer include the stud. A new kit, P/N 525-660 Stainless Steel Side Block Kit, is also available and includes the stainless steel side block assembly, along with both the P/N 550-024 stud *(longer for fiberglass helmets)* and the P/N 550-178 stud *(shorter for stainless steel helmets)*.

Always purchase your Kirby Morgan® products from an authorized Kirby Morgan® dealer. A list of all authorized Kirby Morgan® dealers is available on our website, www.kirbymorgan.com/dealers.

Please contact your authorized KMDSI dealer or e-mail sales@kirbymorgan.com for more information.
