Bulletin #7 of 2026. November 12, 2026

NEW PRODUCT BULLETIN

Stainless Steel Bracket Kits and Mount Block Kit

Products Affected: All stainless steel helmet models.

A new camera and light bracket is now available for all Kirby Morgan® stainless steel helmet models: P/N 525-708 Stainless Steel Helmets (Starboard) Bracket Kit and P/N 525-710 Stainless Steel Helmets (Port) Bracket Kit. Both kits include a Mount Block, and additional or replacement Mount Blocks can be purchased individually with the P/N 525-712 Mount Block Kit (1× mount block included). The bracket runs from the face port to the rear of the shell and includes multiple mounting points. When paired with the Mount Block, the diver can adjust their camera or light direction by 30 degrees while operating underwater.

The helmet on the left above shows the starboard bracket kit with the mount block attached, while the one on the right shows the port bracket without the mount block.

Always purchase your Kirby Morgan® products from an authorized Kirby Morgan® dealer. A list of all authorized Kirby Morgan® dealers is available on our website, www.kirbymorgan.com/dealers.

Please contact your authorized KMDSI dealer or e-mail sales@kirbymorgan.com for more information.
