**Bulletin #6 of 2010. October 6, 2010**

**(UPDATED August 12, 2019)**

**Change To Product Bulletin**

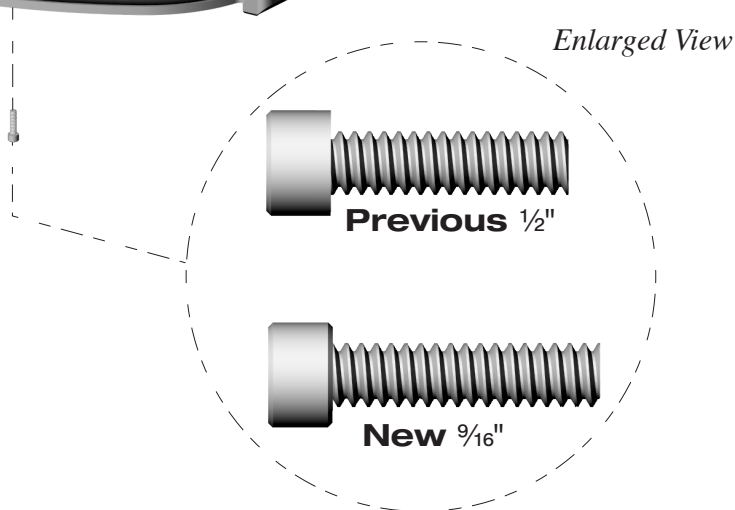

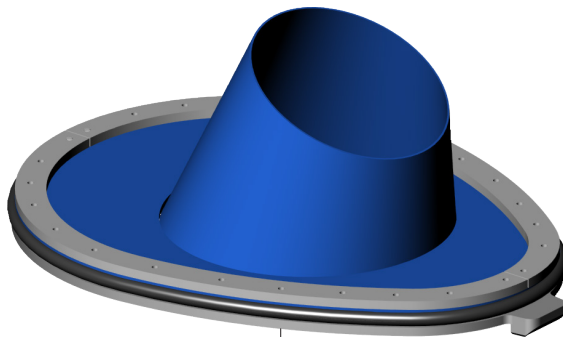

**Length of Part Number 530-024, Screw, Increased**

**Assemblies and Kits Affected:** 505-090, 505-093, 505-094, 505-095, 505-097, 505-100, 505-101, 505-102, 505-104, 505-118, 505-119, 505-120, 505-744, 505-745, 505-746, 505-747, 525-216, 525-230, 525-341, 525-347, 525-349, 525-372 and 525-379.

Kirby Morgan has slightly increased the length of part number 530-024, neck ring assembly screw, to better accommodate the various **dry suit yokes** that may have variations in thickness. This will help provide maximum thread engagement when using a lock in dry suit configuration.

The length of the screw was increased from  $\frac{1}{2}$ " to  $\frac{9}{16}$ ". **The length added to the screws was done in case needed. The additional length is not required for standard neck dams.**

**No change in price.**
