**Bulletin #6 of 2007. October 22, 2007**

**Change to Product**

**New Flex Control Knobs, Part Numbers 520-524 & 520-525**

**Products Affected:** 300-145, 300-150, 300-155, 325-095, 505-024, 505-025, 505-070, 505-071, 505-080, 505-081, 525-049, 525-311 and all Kirby Morgan Helmets and BandMasks.

Both of the new flex control knobs are now available from Kirby Morgan. The combination of more grip edges and a slightly flexible polyurethane material, give these knobs an improved grip, while also providing increased impact resistance over the older, rigid control knobs, part numbers 520-016 and 520-025. Severe impacts will be less likely to transfer to mating components. They are currently available as direct replacements for the old style knobs. There is no price change at this time. Part number 520-524 replaces part number 520-016 and part number 520-525 replaces part number 520-025.

*Old control knobs, part numbers 520-016 & 520-025*

*New flex control knobs provide better grip and increased impact resistance. Part numbers 520-524 & 520-525*
