Product Bulletin #8 of 2005

KMDSI Band Mask® Band Keeper™ Kit - No Hood, P/N 525-121 May 11, 2005

The Kirby Morgan Band Keeper™ Kit (without a hood) is now available. All users of Kirby Morgan Band Masks® are strongly encouraged to install this kit if they own an older mask that did not include Band Keepers™ when purchased, and they already own a serviceable hood. The purpose of the Band Keepers™ is to help prevent the bands or hood from separating from the Band Mask® frame during a dive.

The new Band Keeper™ kit comes with all the parts and instructions required to perform a proper installation of this product, provided the customer already has the newer, "band keeper style" hood.
